STITCHED TEXTILES

I am a designer maker, member of the Society of Designer Craftsmen.

Reference to pattern and colour from studies of ethnic artefacts and textiles inspire my work, the imperfections and variations in scale and colour and the provenance whether real or imaginary adds to their appeal.

By combining a mix of painted fabric and paper pieces with stitch I gradually build up the surface decoration towards the finished wall pieces.

Lutradur lends itself to the spiral forms of my sculptures / lights which are painted, stitched and heat tooled. The opacity of the coloured and decorated fabric is given another dimension with an additional light source.
